

RELATIVE
MATURITY

105
DAYS

PRODUCT HIGHLIGHTS

- Very high yielding hybrid
- Excellent drydown
- Very good test weight
- Good ear flex
- Do not push the population
- Broad fit for maturity zones 105 and 110
- Geographic zone adaptation C and E
- Performs across all yield environments
- Comparison testing showed strong yield versus common checks

TRAIT OPTIONS

ALWAYS FOLLOW GRAIN MARKETING
AND STEWARDSHIP PRACTICES.

AGRONOMIC RATINGS

1 = Poor | 9 = Excellent

DISEASE TOLERANCE

1 = Poor | 9 = Excellent

PLANT CHARACTERISTICS

EAR CHARACTERISTICS

IDEAL PLACEMENT

- ✓ High-yield environments
- ✓ All soil types

Best performance in
IL, IN, OH, IA, MI & KY

MANAGEMENT TIPS

- ✓ Do not push the population.
- ✓ Plant in well-drained soils when soil temperatures reach 50°F.
- ✓ Maintain moderate to high plant populations.
- ✓ Manage for maximum yield potential.

YIELD PERFORMANCE

Comparison testing showed strong yield performance versus common checks across environments.

YIELD ENVIRONMENT	BU/A	VS. TRIAL AVG	RANK
High Yield	255.4	+8.0	Top 15%
Medium Yield	232.0	+6.7	Top 20%
Low Yield	194.8	+6.1	Top 20%
All Environments	227.4	+7.0	Top 15%
